
TABLE OF CONTENTS Manual No. 2

Guidelines for Structural Health Monitoring

PREFACE

1 INTRODUCTION

1.1	Scope of the Manual.....	1.1
1.2	Basic Concepts	1.1
1.3	Analogy.....	1.3
1.4	Subsystems and Classification of Structural Health Monitoring.....	1.3
1.5	Advantages of Structural Health Monitoring.....	1.4

2 COMPOSITION OF STRUCTURAL HEALTH MONITORING

2.1	Acquisition of Data	2.1
2.2	Communication of Data.....	2.3
2.3	Intelligent Processing of Data.....	2.3
2.4	Storage of Processed Data.....	2.4
2.5	Diagnostics.....	2.4
2.6	Retrieval of Data	2.4

3 STATIC FIELD TESTING

3.1	Introduction.....	3.1
3.2	Types of Static Tests	3.1
3.2.1	Behaviour Tests.....	3.2
3.2.2	Diagnostic Tests.....	3.2
3.2.3	Proof Tests.....	3.3
3.3	Equipment for Testing.....	3.3
3.4	Case Histories.....	3.4
3.4.1	Girder Bridges	3.4
3.4.1.1	Bridge with Timber Decking	3.5
3.4.1.2	A Non-Composite Slab-On-Girder Bridge	3.8
3.4.1.3	A New Medium Span Composite Bridge	3.10
3.4.2	Steel Truss Bridges	3.11
3.4.2.1	Interaction of the Floor System with the Bottom Chord	3.12
3.4.2.2	Component Interaction	3.13
3.4.3	Misleading Appearance.....	3.14
3.4.3.1	Cantilever Sidewalk.....	3.14
3.4.3.2	A Bridge Without Construction Drawings.....	3.14
3.4.4	Summary.....	3.15
3.5	Proof Loads	3.16
3.5.1	Proof Loads Versus Legal Loads	3.16
3.5.2	Proof Loads for Deficient Bridges.....	3.18

4 DYNAMIC FIELD TESTING

4.1	Stress History Tests.....	4.1
4.2	DLA Tests.....	4.1
4.2.1	Definition of Dynamic Increment	4.1
4.2.2	Factors Responsible for Misleading Conclusions.....	4.4
4.2.2.1	Vehicle Type.....	4.4
4.2.2.2	Vehicle Weight	4.5
4.2.2.3	Vehicle Position with Respect to Reference Point.....	4.5

Table of Contents
Guidelines for Structural Health Monitoring

4.2.3	Recommendations	4.5
4.3	Ambient Vibration Tests	4.6
4.3.1	Low Sensitivity Damage	4.7
4.3.2	Complexity of the Damage Identification Algorithms	4.8
4.3.3	Effect of Factors Other Than Damage.....	4.8
4.4	Pull Back Tests	4.8

5 PERIODIC MONITORING

5.1	Monitoring Through Ambient Vibrations.....	5.1
5.2	Monitoring Through Testing Under Moving Traffic	5.1
5.3	Monitoring Through Static Field Testing	5.3
5.4	Monitoring Crack Growth	5.4
5.5	Periodic Monitoring of Repairs	5.5

6 GLOSSARY OF CASE HISTORIES

6.1	Beddington Trail Bridge	6.1
6.1.1	Bridge Description.....	6.1
6.1.2	Instrumentation for Monitoring.....	6.2
6.1.3	Diagnostic Results	6.2
6.2	Salmon River Bridge.....	6.2
6.2.1	Bridge Description.....	6.2
6.2.2	Instrumentation for Monitoring.....	6.3
6.2.3	Diagnostic Results	6.4
6.3	Chatham Bridge	6.4
6.3.1	Bridge Description.....	6.5
6.3.2	Instrumentation for Monitoring.....	6.6
6.4	Confederation Bridge.....	6.7
6.4.1	Bridge Description.....	6.7
6.4.2	Instrumentation for Monitoring.....	6.8
6.4.3	Diagnostic Results	6.9
6.5	Crowchild Trail Bridge.....	6.9
6.5.1	Bridge Description.....	6.9
6.5.2	Instrumentation for Monitoring.....	6.10
6.5.3	Field Testing	6.11
6.5.4	Diagnostic Results	6.11
6.6	Taylor Bridge	6.11
6.6.1	Bridge Description.....	6.12
6.6.2	Instrumentation for Monitoring.....	6.13
6.6.3	Diagnostic Results	6.14
6.7	Joffre Bridge	6.17
6.7.1	Bridge Description.....	6.17
6.7.2	Instrumentation for Monitoring.....	6.18
6.7.3	Diagnostic Results	6.18
6.8	Waterloo Creek Bridge.....	6.19
6.8.1	Bridge Description.....	6.19
6.8.2	Bridge Instrumentation for Monitoring	6.20
6.8.3	Diagnostic Results	6.21
6.9	Sainte Emelie-de-l'Energie Bridge	6.22
6.9.1	Bridge Description.....	6.22
6.9.2	Instrumentation for Monitoring.....	6.23

Table of Contents
Guidelines for Structural Health Monitoring

6.9.3	Field Testing	6.23
6.10	Hall's Harbour Wharf	6.24
6.10.1	Structure Description	6.24
6.10.2	Instrumentation for Monitoring.....	6.26

7 NOTATION AND DEFINITIONS

7.1	Notation and Definitions	7.1
-----	--------------------------------	-----

8 REFERENCES AND BIBLIOGRAPHY

8.1	References and Bibliography.....	8.1
-----	----------------------------------	-----

APPENDIX A - SENSORS

A.1	Strain Measurement	A.1
A.1.1	Foil Strain Gauge	A.1
A.1.1.1	Strain Gauge Selection	A.2
A.1.1.2	Attachment Techniques.....	A.6
A.1.1.3	Environmental and Mechanical Protection	A.9
A.1.1.4	Lead Wire Effects	A.11
A.1.1.5	Sensitivity to Transverse Strain.....	A.11
A.1.1.6	Temperature Effect	A.11
A.1.1.7	Noise Control.....	A.14
A.1.2	Fibre Optic Strain Gauges.....	A.16
A.1.2.1	Installation and Protection Techniques.....	A.16
A.1.2.2	Temperature Effect	A.17
A.1.3	Vibrating Wire Strain Gauges	A.18
A.2	Linear Variable Differential Transformers	A.18
A.3	Accelerometers.....	A.19
A.3.1	Spring-mass Accelerometers	A.20
A.4	Temperature Sensors.....	A.20
A.4.1	Resistive Temperature Sensors	A.20
A.4.2	Vibrating Wire Temperature Sensors	A.20

APPENDIX B – DATA ACQUISITION SYSTEM

B.1	Sensor Readout Units and Signal Conditioners	B.2
B.2	Data Acquisition Boards.....	B.3
B.3	Data Acquisition Program.....	B.5

APPENDIX C – ALGORITHMS FOR VIBRATION-BASED DAMAGE DETECTION

C.1	Methods Based on Changes in Resonant Frequencies	C.1
C.2	Damage Detection Based on Modal Residual Vector	C.6
C.3	Methods Based on Mode Shape Curvature	C.9
C.4	Matrix Update Methods.....	C.11
