

# TABLE OF CONTENTS

---

<b>1</b>	<b>Preface</b>	
1.1	Preface.....	1.1
1.2	Preface to Version 2.....	1.2
<b>2</b>	<b>ISIS CANADA</b>	
2.1	Overview.....	2.1
2.2	Research Program .....	2.1
2.3	Teaching and Education Activities.....	2.3
<b>3</b>	<b>USING THIS MANUAL</b>	
3.1	General Requirements .....	3.1
3.2	Drawings and Related Documents.....	3.2
3.3	Code References .....	3.2
<b>4</b>	<b>FRP REINFORCING MATERIALS</b>	
4.1	Definitions .....	4.1
4.2	General .....	4.1
4.3	FRP Constituents .....	4.1
4.3.1	Fibres.....	4.2
4.3.2	Resins.....	4.4
4.4	FRP Reinforcing Products and Material Properties .....	4.5
4.4.1	Manufacturing Process .....	4.5
4.4.2	Coefficient of Thermal Expansion of FRP.....	4.6
4.4.3	Effect of High Temperature.....	4.7
4.4.4	Bond Properties of FRP Reinforcing Bars.....	4.8
4.4.5	Fatigue of FRP Reinforcing Bars.....	4.8
4.4.6	Creep and Relaxation of FRP Reinforcing Bars.....	4.9
4.5	Durability of FRP Reinforcing Bars .....	4.9
4.6	Commercially-Available Reinforcing Bars.....	4.12
<b>5</b>	<b>DESIGN PROCESS</b>	
5.1	Definitions .....	5.1
5.2	General.....	5.1
5.3	Limit States Design .....	5.1
5.4	Load Factors and Loading Combinations for Buildings.....	5.2
5.4.1	Resistance Factors .....	5.3
5.4.2	Service Stress Limit for Glass FRP CSA S806-02.....	5.3
5.5	Load Factors and Loading Combinations for Bridges .....	5.3
5.5.1	Load Combinations.....	5.4
5.5.2	Resistance Factors .....	5.5
5.5.3	Service Stress Limits States - CHBDC.....	5.5
5.6	Constitutive Relationships for Concrete.....	5.6
5.6.1	Tensile Strength.....	5.6
5.6.2	Compressive Behaviour.....	5.6
5.6.3	Modulus of Elasticity .....	5.8
5.7	Constitutive Relationship for FRP .....	5.8
5.7.1	Tensile Strength and Modulus of Elasticity .....	5.8
5.7.2	Compressive Strength and Modulus of Elasticity .....	5.9

---

<b>6</b>	<b>DESIGN FOR FLEXURE</b>	
6.1	Definitions .....	6.1
6.2	General.....	6.1
6.3	Strain Compatibility .....	6.2
6.4	Modes of Failure.....	6.2
6.4.1	Balanced Failure Reinforcement Ratio .....	6.3
6.4.2	Failure Due to Crushing of Concrete.....	6.5
6.4.3	Tension Failure .....	6.7
6.5	Cracking Moment.....	6.10
6.6	Minimum Flexural Resistance .....	6.10
6.7	Additional Criteria for Tension Failure.....	6.10
6.8	Beams with FRP Reinforcement in Multiple Layers .....	6.11
6.9	Beams with Compression Reinforcement.....	6.11
6.10	Beams with Multiple Reinforcement Types.....	6.11
6.11	Examples.....	6.12
6.11.1	Rectangular Beam Example.....	6.12
6.11.2	Slab Example.....	6.15
6.12	Concrete Slab-On-Girder Bridge Decks.....	6.16
6.12.1	Flexural Method – FRP-Reinforced Deck Slabs .....	6.17
6.12.2	Internally Restrained Bridge Deck Design – FRP-Reinforced .....	6.17
6.12.3	Example: GFRP-Reinforced Deck Slab .....	6.18
<b>7</b>	<b>SERVICEABILITY LIMIT STATES</b>	
7.1	Definitions .....	7.1
7.2	General.....	7.2
7.3	Calculation of Service Stresses .....	7.2
7.4	Cracking.....	7.3
7.4.1	Permissible Crack Width.....	7.3
7.4.2	Strain Limit Approach.....	7.4
7.4.3	Crack Width Calculation .....	7.4
7.5	Deflection .....	7.5
7.5.1	Minimum Thickness of Members Reinforced with FRP.....	7.6
7.5.2	Effective Moment of Inertia Approach.....	7.7
7.5.3	Curvature Approach .....	7.8
7.5.4	Deflection Under Sustained Load .....	7.10
7.5.5	Permissible Deflection.....	7.10
7.5.6	Example: Determining Minimum Thickness Using Span-to-Deflection Ratio .....	7.11
7.6	Example of Service Stress, Crack Width and Deflection Calculations .....	7.12
<b>8</b>	<b>DEVELOPMENT, ANCHORAGE AND SPLICING OF REINFORCEMENT</b>	
8.1	Definitions.....	8.1
8.2	General.....	8.1
8.3	Development Length and Anchorage.....	8.1
8.4	Splicing of FRP Reinforcement .....	8.2

---

<b>9</b>	<b>DEFORMABILITY</b>	
9.1	Definitions .....	9.1
9.2	Deformability .....	9.1
9.3	Example of Deformability Calculations .....	9.2
<b>10</b>	<b>SHEAR DESIGN</b>	
10.1	Definitions .....	10.1
10.2	General .....	10.1
10.3	Beams with FRP Web Reinforcement .....	10.2
	10.3.1 Types of FRP Stirrups .....	10.2
	10.3.2 Detailing of FRP Stirrups .....	10.2
	10.3.3 Shear Resistance Provided by FRP Stirrups .....	10.3
	10.3.4 Maximum Strain in FRP Stirrups .....	10.4
10.4	Modes of Failure .....	10.4
10.5	Shear Resistance Provided by Concrete .....	10.5
10.6	Minimum Amount of Shear Reinforcement .....	10.5
10.7	Maximum Spacing of FRP Stirrups .....	10.6
10.8	Shear Design Example .....	10.6
<b>11</b>	<b>PLACEMENT OF REINFORCEMENT AND CONSTRUCTABILITY</b>	
11.1	General .....	11.1
11.2	Spacing of Longitudinal Reinforcement .....	11.1
11.3	Graders, Sizes, Bar Identification .....	11.1
11.4	Strength and Modulus Grades .....	11.1
11.5	Surface Geometry .....	11.1
11.6	Bar sizes .....	11.2
11.7	Bar Identification .....	11.2
11.8	Concrete Cover .....	11.2
11.9	Constructability .....	11.3
11.10	Handling and Storage .....	11.3
	11.10.1 Gloves .....	11.4
	11.10.2 On-Site Storage .....	11.4
	11.10.3 Ultra-Violet Radiation .....	11.4
	11.10.4 High Temperatures .....	11.4
	11.10.5 Moisture and Chemicals .....	11.4
	11.10.6 Lifting and Hoisting .....	11.4
	11.10.7 Cutting .....	11.5
11.11	Placement and Assembly .....	11.5
	11.11.1 Oil and Grease .....	11.6
	11.11.2 Bar Placement .....	11.6
	11.11.3 Contact between Steel and FRP Bars .....	11.6
	11.11.4 Ties and Rebar Chairs .....	11.6
	11.11.5 Splices .....	11.7
	11.11.6 Reinforcement Cage Floating .....	11.7
	11.11.7 Vibrating .....	11.8
	11.11.8 Bends and Hooks .....	11.8
	11.11.9 Walking on FRP Bars .....	11.9
11.12	Quality Control and Quality Assurance .....	11.9
	11.12.1 Prior to Construction .....	11.10
	11.12.2 During Construction .....	11.10
	11.12.3 Common Safety Precautions .....	11.11

---

<b>12</b>	<b>FIELD APPLICATIONS</b>	
12.1	Crowchild Bridge, Alberta .....	12.1
12.2	Hall's Harbor Wharf, Nova Scotia .....	12.2
12.3	Joffre Bridge, Québec .....	12.3
12.4	Taylor Bridge, Manitoba.....	12.3
12.5	Centre Street Bridge, Alberta.....	12.4
12.6	Brookside Cemetery Marker Mountings, Manitoba .....	12.5
12.7	Université de Sherbrooke Pedestrian Bridge, Québec .....	12.6
12.8	Laurier Taché Parking Garage, Gatineau (Québec).....	12.7
12.9	Val-Alain Bridge on Highway 20 East (Québec).....	12.8
12.10	Continuous Reinforced Concrete Pavement with GFRP bars on Highway 40 East-Montreal .....	12.9
12.11	Deck Rehabilitation of Glendale Avenue Bridge (Region of Niagara, Ontario) .....	12.9
<b>13</b>	<b>NOTATION</b>	
13.1	Notation.....	13.1
<b>14</b>	<b>GLOSSARY</b>	
14.1	Glossary .....	14.1
<b>15</b>	<b>REFERENCES</b>	
15.1	References.....	15.1
<b>APPENDIX A – FRP Resources</b>		
A.1	FRP Suppliers.....	A.1
A.2	Commercially-Available Reinforcing Bars.....	A.1
A.2.1	Glass Fibre-Reinforced Polymer Products.....	A.1
A.2.2	Carbon Fibre-Reinforced Polymer Products .....	A.3
A.2.3	Aramid Fibre-Reinforced Polymer Products .....	A.5
<b>APPENDIX B – DESIGN TABLES</b>		
B.1	Design Tables.....	B.1
<b>APPENDIX C – ISIS CANADA ANALYSIS SOFTWARE FOR FRP-REINFORCED CONCRETE</b>		
C.1	ISIS Canada Analysis Software for FRP-Reinforced Concrete .....	C.1
